

FIELD APPLICATION ENGINEER (M/F/D)

JOB ID 190452

Our client is leading company (Joint Venture) in cutting edge sensing technology with over 4 decades of experience in environmental sensor technology. Its solution portfolio covers products for air quality sensing, humidity and temperature sensing, ultrasonic flow sensing, time-to-digital converters and pressure sensor development. Its products will be sold within well-known global industry partners, covering Automotive, Telecommunication, Industrial Control and Home Appliance companies all over the world.

To strengthen the team of our client at his site in **Shanghai (CN) or Shenzhen (CN)** we are currently looking for a **Field Application Engineer (m/f/d)**.

Key Responsibilities

- Technical promotion (presentation/demonstration) of mainly Environmental sensors products
- Technical support and trainings to distribution partners or directly to customers in Great China region (including South East Asia)
- Working closely with Business Line, Regional Sales and Marketing Teams, Distributors and Customers, the role includes proactive support of customer design engineers and support sales drive design wins
- Provide effective problem solving and troubleshooting skills in the field
- Performance analysis of own and competitive products including evaluation reports
- Generate localized technical documents such as application notes/user manuals and videos
- Specify reference app's for target markets including system architectures, circuits and components
- Contribute to the definition of new products through the New Product Proposal Process

Your Profile

- Bachelor's degree (or above) from a four-year University- BSEE, or local equivalent
- At least 5 years' experience of working and at least 2 years field application engineer experience in an international semiconductor/sensor company
- Considerable know-how in electronics development (hardware and software)
- Experience with analog or mixed signal circuit or electrical system design
- Proficient communication skills in oral and written English
- Willing to work in international teams and willing to travel
- High initiative, self-motivation and hard-working attitude
- Excellent Team work

If the described job definition is interesting for you and you fulfil the necessary requirements, we are glad to receive your job application via mail (R.Krahberg@ah-recruitment.com).
