

FIELD APPLICATION ENGINEER (M/F/D) – GAS & HUMIDITY SENSING EUROPE

JOB ID 190752

Our client is leading company (Joint Venture) in cutting edge sensing technology with over 4 decades of experience in environmental sensor technology. Its solution portfolio covers products for air quality sensing, humidity and temperature sensing, ultrasonic flow sensing, time-to-digital converters and pressure sensor development. Its products will be sold within well-known global industry partners, covering Automotive, Telecommunication, Industrial Control and Home Appliance companies all over the world.

To strengthen the team of our client at his site in **Reutlingen (DE) or Eindhoven (NL)** we are currently looking for a **Field Application Engineer (m/f/d)**. In this role you work within the gas and humidity sensor product lines.

Key Responsibilities

- Responsible for providing technical support to distribution partners or directly to customers in Europe, Americas and Asia (except China)
- Interact with marketing and sales and engineering teams, as well as distribution partners on a continuous basis
- First-line customer design-in support (remote and on-site), including hardware and software implementation reviews, technical assistance, training and product demonstrations
- Reproduce and verify customer issues and identify proper solutions or workarounds
- Generate promotion, support and training material (application notes, videos, etc.)
- Support organization and participation to tradeshow and conferences

Your Profile

- Bachelor or Master Degree in Electronics Engineering or related field
- Experience with system level engineering/design of sensor solutions (hardware and software)
- 5+ years experience of working in an international company in System Engineering, Field Application or associated roles
- Good knowledge of programming languages (C/C++, Labview)
- Ability to identify technical problems and solution strategies
- Able to adapt to a very dynamic work environment and changing customer requirements
- Good negotiation and communication as well as good critical thinking and problem-solving skills
- Excellent communication skills in oral and written English, German is a plus
- High initiative, self-motivation and a hard-working attitude
- Ability to organize and prioritize work
- Willing to work with international teams and to travel (25-50%)

If the described job definition is interesting for you and you fulfil the necessary requirements, we are glad to receive your job application via mail (R.Krahberg@ah-recruitment.com).
