

QUALITY ENGINEER (M/F/D)

JOB ID 190852

Our client is leading company (Joint Venture) in cutting edge sensing technology with over 4 decades of experience in environmental sensor technology. Its solution portfolio covers products for air quality sensing, humidity and temperature sensing, ultrasonic flow sensing, time-to-digital converters and pressure sensor development. Its products will be sold within well-known global industry partners, covering Automotive, Telecommunication, Industrial Control and Home Appliance companies all over the world.

To strengthen the team of our client at his site in **Reutlingen (DE)** we are currently looking for a **Quality Engineer (m/f/d)**.

Key Responsibilities

- Owns full Quality Engineering responsibility for existing products in production. Main focus is on gas sensor modules for automotive-OEMs
- Develops qualification strategy / plans for assigned projects. Plans, supervises and coordinates qualification execution in cooperation with reliability test laboratories - ensuring first time right.
- Develops new failure analysis methods for assigned projects in teamwork with failure analysis teams
- Performs failure analysis and 8D reporting, initiates and drives the implementation of containment / corrective actions
- Drives and manages quality and reliability issues, as well as continuous improvement in all areas of interest
- Represents Quality in internal and external meetings and events, leads Quality-related communication with OEMs
- Responsible for Quality Engineering for new product developments as part of the project team

Your Profile

- Engineering Degree / Master in technical discipline like Material Sciences, Physics, Chemistry or Electronics
- Experience in PPAP-Process
- Experience in electronics industry, preferably in the field Quality, Reliability and/or Failure Analysis Engineering
- Know-how of quality tools (FMEAs, 8-D reporting, VDA6.3, IATF 16949 and QS9000 Quality Standards) is beneficial
- Strong leadership and communication skills (self-driven, proactive, taking initiative, team player)
- Good customer interface skills
- Excellent analytical problem solving skills, high self-organizing skills
- Ability to succeed in a fast paced environment, stays cool and works efficiently under pressure
- Business fluent German (spoken), Fluent English (spoken and written)
- Willingness to travel and to work in international teams
