

PROJECT MANAGER (M/F/D)

JOB ID 191452

Our client is a leading company (Joint Venture) in cutting edge sensing technology with over 4 decades of experience in environmental sensor technology. Its solution portfolio covers products for air quality sensing, humidity and temperature sensing, ultrasonic flow sensing, time-to-digital converters and pressure sensor development. Its products will be sold within well-known global industry partners, covering Automotive, Telecommunication, Industrial Control and Home Appliance companies all over the world.

To strengthen the team of our client at his site in **Eindhoven (NL)** we are currently looking for a **Project Manager (m/f/d)**.

Key Responsibilities

- Leading small to mid-size projects in an R&D and industrialization environment
- Responsible for organizing and documenting project meetings
- Project planning and execution of the plan
- Budgeting, cost control and reporting of project status
- Driving risk assessment and risk mitigation
- Preparation of project proposals

Your Profile

- Master of Science in Electronics, Physics, Material Sciences or equivalent areas
- +3 years of experience with project administration / project management
- Basic knowledge of the semiconductor industry is an advantage
- Affinity with product development, sensor development and industrialization
- Team player/driver, good motivator as well as presentation and organizational skills
- Fluent English spoken and written, strong communication skills
- Willingness to travel

If the described job definition is interesting for you and you fulfil the necessary requirements, we are glad to receive your job application via mail (R.Krahberg@ah-recruitment.com).
